EXPERIENCE

Paymerang | Richmond, VA   July 2020 – Present
Software Developer II
- Built internal and customer-facing user interfaces and integrated with internal APIs to create full-stack applications.
- Developed back-end applications, cloud-native APIs and databases.
- Integrated applications with third-party APIs including Auth0, QuickBooks Online, and Blackbaud.
- Created and implemented conceptual and technical designs of new application features with an emphasis on elegant patterns and scalability.
- Led an initiative to automate API testing and served as a Subject Matter Expert to train teammates on developing API tests.
- Mentored junior developers through onboarding activities, code reviews, and pair programming.
